

Meter Serial Number Guide

Introduction

Sycous provide a vast range of meters for all utilities and the identification of meter serial numbers can often be confusing.

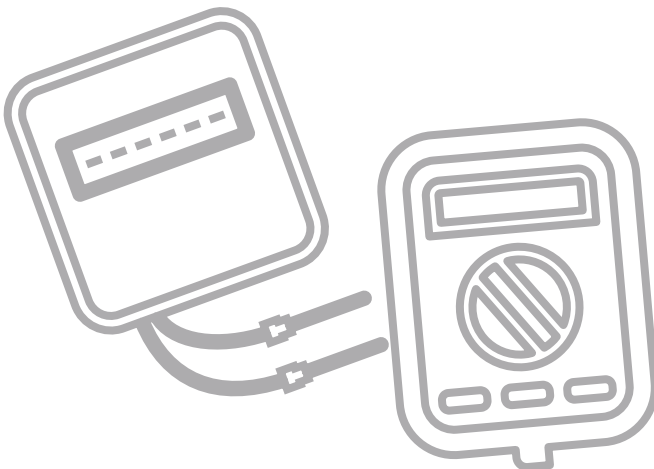

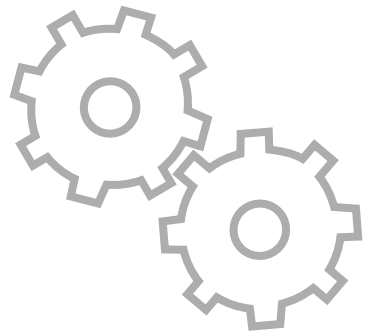

We have created this document to clearly show installers where to collect the correct meter serial numbers on all meter types offered by Sycous.

Prior to Sycous commissioning data loggers, the installer is required to collect meter serial numbers to property addresses. Ideally, this should be in excel format and not PDF. This is to ensure Sycous know which meters are in which property for utility billing purposes.

If you need any clarification or support, please do contact us on 0113 360 4776 or at info@sycous.com.

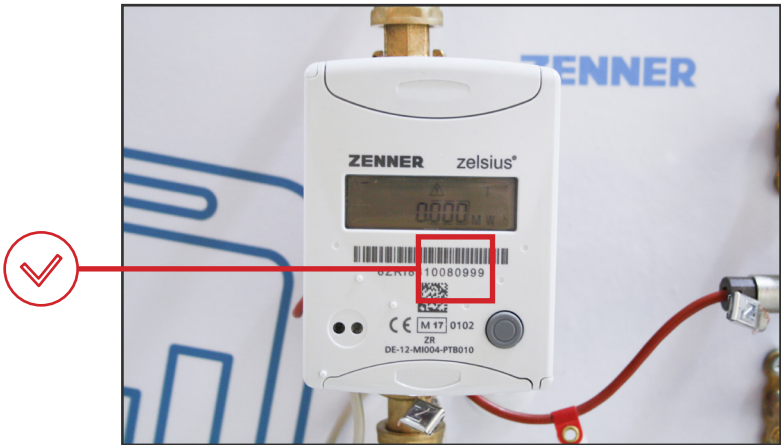

This document covers the full range of:

- Heat and/or cooling meters
- Water Meters
- Electric Meters
- Convertors

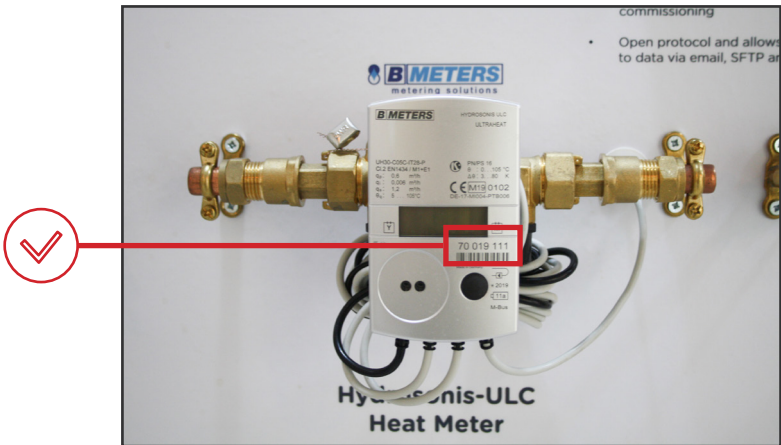

Heat and/or cooling meters

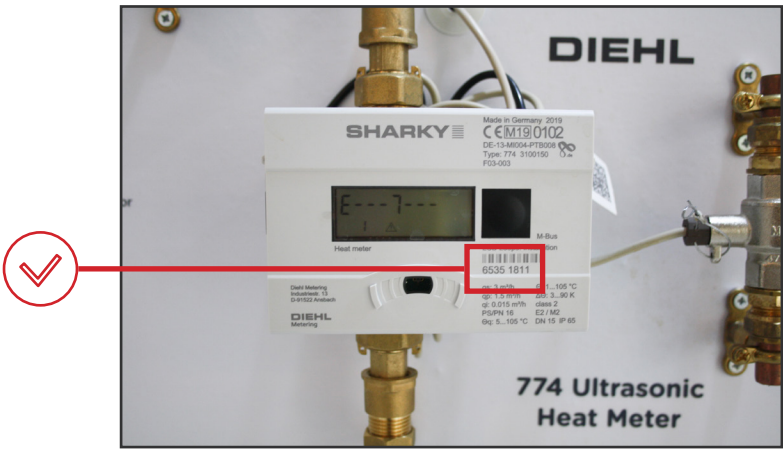

Zenner C5

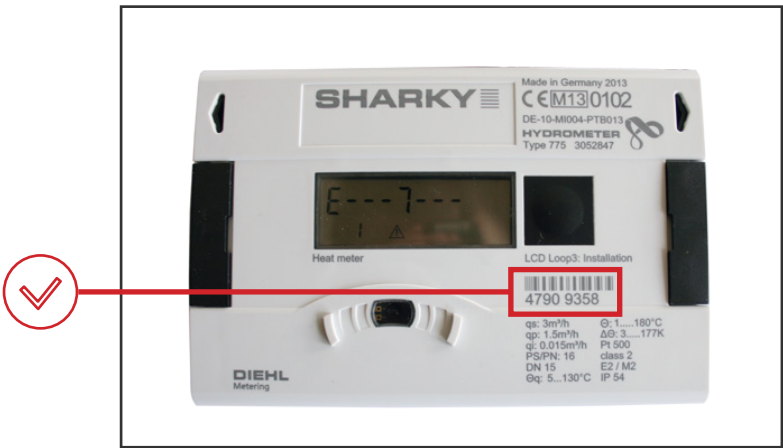

B Meters Hydrsonic ULC

Diehl Sharky 774

Diehl Sharky 775

Water Meters

Zenner ETKD/ETWD

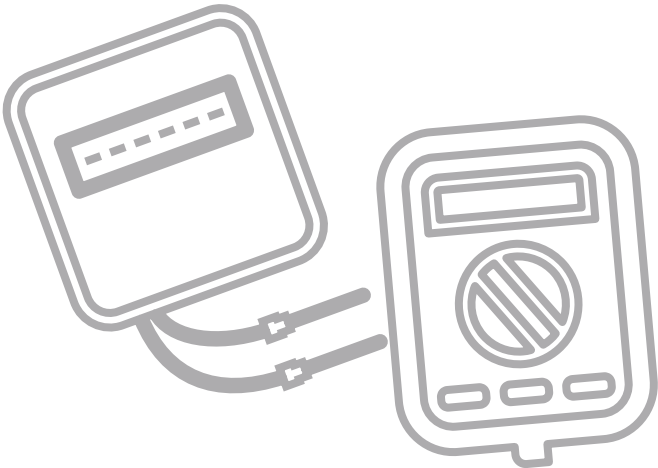

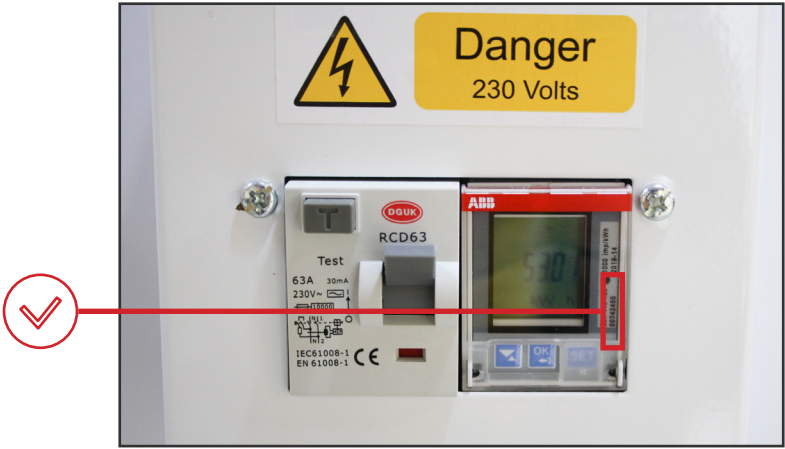

B Meters GSD8-RFM

Electric Meters

ABB B21

Convertors

IZAR MBus to Wireless MBus

Please note you must also collect the serial number of the meter that is connected to the convertor and also the serial number on the convertor as detailed above.

Zenner PDC Pulse to Wireless MBus convertor

Please note you must also collect the serial number of the meter that is connected to the convertor and also the serial number on the convertor as detailed above.
