

Release 2024.13 [19/08/2024]

General Overview & Impact

🌱 We have added new supply types for Electric - Generation & Export, this will allow for metering of electric energy generated from renewable energy sources.

🇦🇪 We have also implemented the Network hosted payment page to be within an Iframe on our consumer dashboard page, this will allow for a better user experience overall for customers in the UAE.

✚ We have also added the manufacturer "inepro" to allow for metering of devices from this manufacturer.

🔧 A big portion of this release consists of work done to upgrade Mabdeck to .NET8.

✨ Work on the upcoming Friendly Disconnect and Emergency Credit features continues- this will remain hidden on the frontend until the work is completed.

New features

- Add new supply type for "Electricity (Generation)" - [PBI/17374](#)
- Add new supply type for "Electricity (Export)" - [PBI/17239](#)
- Add new Meter Manufacturer - INM - [PBI/16411](#)
- Network Hosted Payment Page (Iframe) - [PBI/17327](#)
