Release 2024.15 [26/09/2024]

General Overview & Impact

💸 With this release, We have continued to make progress on our larger projects which continues to be hidden on the production instances until the MVP is met.

📈 This release also included other improvements such as not selecting a PAYG Tariff if only has a time-based charge is present for Orbit & creation of hubs only when all the required information is specified for Orbit.

🏦 With the release, we have started credit control overhaul with the database structure being created.

💰 In the release, we have generation of invoice templates via Mabdeck although this will be hidden for a short until work is complete.

✨ Work on the upcoming Friendly Disconnect and Emergency Credit features continues- this will remain hidden on the frontend until the work is completed.
