Release 2025.2 [20/02/2025-]

General Overview & Impact

🪐 Orbit

In this release, work has been completed on Orbit, so that an emergency credit limit and a cut-off value can be stored on the hub. These values will be taken into account when the hub balance reaches zero. We will also log each time a hub reaches its emergency credit limit, uses emergency credit, and restores its balance.

- Store Emergency Credit information on the hub - PBI/17692
- Emergency Credit Updates - PBI/14874
- Only allow change to PAYG mode when there is 1 matching charge - PBI/18675
- Implement default amounts for Cut Off - PBI/19764
- Emergency Credit Events - PBI/18509
- Open/close valve events - PBI/18508
- Manual open/close valve events - PBI/19767
- Change of billing mode flow - PBI/19887

🤑 Credit Control

A significant amount of work has been completed on the new Credit Control structure. In this release, we have re-built the functionality for creating a Credit Control procedure, and adding actions to Credit Control stages. All of this work is progressing towards completely replacing the existing Credit Control structure in Mabdeck.

Although these changes will remain hidden in Mabdeck for a period of time, until the new structure is ready in its entirety, we hope this gives an idea of the work going on in the

background to replace the existing functionality.

- Creation of a stage - PBI/18433
- Create Telephone Action - PBI/18434
- Create Email Action - PBI/18435
- Create Letter Action - PBI/18437
- Create Flag Action - PBI/18436
- Ability to edit a stage - PBI/18515
- Ability to remove an action - PBI/18438
- Account Debt - remove account debt when credit transactions are removed - PBI/19660
- Sort Clients A-Z in Client Dropdown list - PBI/19695
- Remove Credit Control flags page - PBI/19786

🧮 Guru Readings

In this release, we have streamlined the way in which we call the Guru API, to be able to get back readings from Guru Systems. Previously, we were making a large number of requests to each meter, however this has been updated to request readings at gateway level.

- Cut down on API requests for Guru Readings - PBI/17924

⭐ Small Improvements

We have made a number of small improvements to the existing functionality, to elevate the user experience. This includes the ability to refund security deposit transactions. Please find an overview of all of these minor improvements below:

- Ability to refund Security Deposit transactions - PBI/16485
- Show transaction reference for Careem Transactions - PBI/19672
- Move Peer Comparison to its own storage account - PBI/19789

🔼 General upgrades and fixes

We are currently working on upgrading Mabdeck to the newest version of .NET, which will help us to maintain ISO27001. As part of the ongoing work to upgrade Mabdeck, there are some more changes in this release which will help towards that. Although you won't be able to see these changes themselves, be assured that the code is being tweaked and improved in the background, and we hope your front end experience will become a lot smoother as a result of this too.
