

Release 2025.3 [17/03/2023-]

General Overview & Impact

Orbit

In this release, some Orbit-Mabdeck integration was completed which makes it possible for events from Orbit (such as balance updates) to be handled by Mabdeck appropriately and in so doing, send the correct data to the correct user. Additionally, work was done on the balance update events so that the balance and last communication date/time on the Hub Information panel on the Accounts Page always correlates with that on Orbit. On the Hub Information panel on the Accounts Page, work was also done to remove the 'Last Meter Reading' field from the panel. Lastly, work commenced on the concept of solutions in Orbit.

- Add Endpoints in Orbit - [PBI/17493](#)
- Add solution when adding a hub in Orbit - [PBI/17494](#)
- Ability for Mabdeck to consume events from Orbit - [PBI/18294](#)
- Balance Update Event Error - Mabdeck - [PBI/18470](#)
- Update to Hub Information (Orbit) - [PBI/18474](#)

Credit Control

2025.3 brings even more progress made on the Credit Control structure overhaul. This release focused on the management of the actions on stages of credit control.

- CreditControlDebt Procedure - Manage a Telephone Action - [PBI/19690](#)
- CreditControlDebt Procedure - Manage a Flag Action - [PBI/19691](#)
- CreditControlDebt Procedure - Manage an Email Action - [PBI/19692](#)
- CreditControlDebt Procedure - Manage a Letter Action - [PBI/19693](#)

Statement Generation

As part of a larger project to improve the speed of the Billing Runs page, the first steps were taken to update the database for this.

- Billing Runs- Addition of statuses on the billing run - [PBI/19546](#)

Small Improvements

This release saw a few improvements for EE monitor hubs where, now, a changeover date field is included on the Change Billing Mode form. This enables EE manager to calculate any additional charges for the resident.

- Changeover date field on PAYG mode form - [PBI/19749](#)
- Changeover date field on Credit Mode form - [PBI/19750](#)

General upgrades and fixes

We are currently working on upgrading Mabdeck to the newest version of .NET, which will help us to maintain ISO27001. As part of the ongoing work to upgrade Mabdeck, there are some more changes in this release which will help towards that. Although you won't be able to see these changes themselves, be assured that the code is being tweaked and improved in the background, and we hope your front end experience will become a lot smoother as a result of this too.
