Release 2025.6 [13/05/2025-]

General Overview & Impact

⬆️ Mabdeck .NET8 Upgrade! ! !

This release contains an upgrade of the Mabdeck .NET framework, to .NET8.

🤖 Reading Robots

Ability for the Meterpoint system readings to be automatically processed into Mabdeck so that they do not need to be uploaded manually.

☐ Readings Robot: Meterpoint PBI/19923

✉️ Invoice and Correspondence work: FIT

A fair bit of work was completed regarding the Invoice functionality developed by the FIT team in Dubai. This included the ability to generate an invoice displaying the correct VAT to the customer depending on the TRN number selected, creation of invoice placeholders to be displayed on correspondence and the generation of a correspondence reference number for each piece of correspondence created in Mabdeck for existing and future correspondence.

☐ Generate invoice - Individual transaction PBI/16568
☐ Invoice Placeholders - General Invoice Details PBI/19395
☐ Invoice Placeholders - Client Bank Details PBI/20412
☐ Generate Correspondence Reference Number PBI/20548

👤 Accounts - Change Billing Mode Improvements

In this release, work was done to improve the change billing mode functionality from PAYG mode to Credit mode on the accounts page in Mabdeck by locking the 'Confirm' button on the modal form so that the user is prevented from double clicking the button. This avoids the unintentional creation of duplicate SupplyPointGroups for the SupplyPoint in the database, which has been causing some penguin pages on an account, recently.

- [ ] View Account - Change Billing Mode to Credit Button to Lock once pressed PBI/20552

✨ General Improvements

In 2025.6, automatically generated Security Deposit transactions are now created by the system user, so that it is clear these were generated automatically instead of by the user. Additionally, we have updated Fetcher so that it is now using a .NET version that is supported.

- [ ] Fetcher .Net Framework Rewrite - PBI/9596
- [ ] Automatically generated Security Deposit transactions to be created by System user - PBI/20419

Fixes

- [ ] Statements - Error when trying to generate when the band start date is after statement generation date - Bug/2827
- [ ] Element IoT > Readings are not being added to Mabdeck Bug/19466
