Release 2025.7 [03/06/2025-22/06/2025]

General Overview & Impact

🖥️ API Changes

In the latest release we have made changes to the API call we make to the Secure API so that we can accommodate devices with different supply types.

- ✓ Changes to Secure API Calls - Supply Types PBI/15056

🪐 Orbit

We have made changes to the way readings are passed through into Orbit. These changes ensure that only readings that calculate consumption are sent to Orbit, cutting down on the amount of unnecessary data that is sent to ensure a better data flow and to future-proof performance.

- ✓ Orbit API- Only send Orbit readings to Orbit - New Function App PBI/20020
- ✓ Orbit API- Only send Orbit readings to Orbit - New Readings flow PBI/19528

📄 Invoices: FIT

In this release we have added placeholders for invoices to allow relevant correspondence information to be added to Invoice templates.

- ✓ Invoice Placholders - General Client Information PBI/20413

🔢 EE Monitor

EE Monitor Hubs in Mabdeck have been amended so that when actioning a change of billing mode from Prepayment to Credit, the Hub balance and debt transactions are not added to the EE Monitor Account to ensure they maintain the correct balance.

- ✓ Do not add hub balance/hub debt to transactions table - PAYG to Credit PBI/20572

🤑 Credit Control

We have made changes to the On Hold functionality of Credit Control. With the new changes, accounts can now be given an expiry date when placed On Hold. This will allow more versatility with how you would like to manage the accounts you have in Credit control. You will also be required to include a reason when placing an Account On Hold to allow easier monitoring of the status of debt.

This change also includes system note generation for when accounts are placed On Hold and taken Off Hold. This will also assist in better monitoring of account debt.

- ✓ On Hold Accounts to have an expiry date - PBI/11431
- ✓ Add system note for on hold accounts - PBI/14567
- ✓ Confirmation Pop-Up for taking account Off-Hold - PBI/20256

Fixes

- ✓ Admin login page - Attempting to log in where an account doesn't exist causes 404 error Bug/15126
- ✓ Billing Profile - Tariffs with an end date in the future are not showing as active Bug/16867
