Release 2025.9 (22/07/25 -)

General Overview & Impact

📄 Multi-Factor Authentication

In this release we have implemented Multi-Factor Authentication. For admin users that have not yet set up MFA, when they next log into Mabdeck they will be redirected to set this up. This will provide better security for users with admin accounts. Users will be directed to download the authenticator app to authenticate their login, and will to remember their login for 14 days, after which MFA will be required again.

- 🟣🟢 Setup MFA - PBI/15890
- 🟣🟢 Enter MFA - PBI/15891
- 🟣🟢 MFA Remember this device - PBI/15892
- 🟣🟢 Recover MFA Code - PBI/15893
- 🟣🟢 Show MFA status on User Management - PBI/16021
- 🟣🟢 Reset MFA on User Management - PBI/16022
- 🟣🟢 MFA Setup - Leaving the page - PBI/21170
- 🟣🟢 Setting up MFA when a user signs up to Mabdeck - Make Mandatory - PBI/21329

🤑 Credit Control

Further work has been done towards the New Credit Control Process. Whilst these changes will not be noticeable until these features go live, they are adding to a more useful and informative Credit Control system

- Function App For New Credit Control - PBI/17584
- Account Debt - Statement Reversal - PBI/18066

📱 App

We have added the ability to pay through Network via the App if you have Network set up as a Payment Provider in Mabdeck.

- [ ] Network in App - Vio API Changes - PBI/19269

📈 General Improvements

Orbit

We have added the ability to have multiple supplies in Orbit, now allowing multiple solutions to be applied to the same Hub. We have also added Default Friendly Disconnect dates and times to ensure that these are applied to all Hubs when they are created in Orbit, removing the need for back-end work when making these changes.

- [ ] Orbit API- Create Supply Entity and configuration files Orbit API - PBI/20627
- [ ] Orbit API - Ability to set Friendly Disconnect Dates and Times defaults - PBI/20960

Fetcher

Fetcher has also been rewritten following the recent .NET upgrade to ensure that Fetcher is using a supported version of .NET.

- [ ] Fetcher .Net Framework Rewrite PBI/9596

Fixes

- [ ] Hubs - Add a Hub - Adding a Network from the Add a Hub form shows incorrect Client - Bug/8495
- [ ] Hardware - Add a Hub - Incorrect client, network, and band when adding a Property - Bug/15198
- [ ] Meter manufacturer dropdown: Some manufacturer types not displaying in alphabetical order - Bug/15473
- [ ] Credit Control Correspondence - Downloading correspondence does not remove it from the page - Bug/15804
- [ ] Edit a Meter > Property change erroring - Bug/19999
- [ ] Dashboard - Vulnerable widget doesn't show accounts filtered by vulnerable status - Bug/20345
