

Release 2025.12 [19/09/2025 - 1]

General Overview & Impact

New Credit Control

This release has seen a huge amount of working being done to improve the Credit Control Process. We have continued implementing the changes for New Credit Control across the various pages in Mabdeck to not only improve on how Debt is tracked and managed, but also provide a more useful and informative front-end for users. Whilst these changes are yet to go live, they will provide a better experience overall.

- ☐ Credit Control Flag - Multiple CreditControlDebts (New Credit Control) - [PBI/17219](#)
- ☐ CreditControlDebt Procedure - Hierarchy of Actions - [PBI/18083](#)
- ☐ CreditControlDebt Procedure - Unable to Contact - [PBI/20025](#)
- ☐ CreditControlDebtProcedure - Telephone Action Slider - [PBI/20038](#)
- ☐ CreditControlDebt Procedure - New Credit Control Correspondence Page with updated table - [PBI/20115](#)
- ☐ Telephone Actions - Pagination and Items-Per-Page for Telephone Action Table - [PBI/20762](#)
- ☐ Telephone Actions - Search Functionality - [PBI/20764](#)
- ☐ Error Validation for New Credit Control Emails - Manage an Action - [PBI/21360](#)
- ☐ New Credit Control Dashboard Widget - [PBI/19697](#)

Orbit

We have worked on further improving the implementation of supplies in Orbit, working towards a concise way of adding Solutions and making sure these interact with Mabdeck.

- ☐ Orbit API- Make Supply mandatory when interacting with supply controller endpoints - [PBI/21565](#)

- ☐ Orbit API- Make Supply mandatory when interacting with Meter endpoints - [PBI/21629](#)
- ☐ Supplies created in Mabdeck on an Orbit network are added to Orbit API - [PBI/21875](#)

SSG Statement Generator

We have completed the work on many of the different stages of Statement Generation to improve the logic for each of these steps. With these changes, we should find that the process of generating and completing a statement works in a more concise way, and the handling of errors more logical and user-friendly.

- ☐ SSG Logic - Approval Stage & Actions - [PBI/17390](#)
- ☐ SSG Logic - Publishing Stage & Actions - [PBI/17391](#)
- ☐ SSG Logic - Rejection process & Actions - [PBI/17419](#)
- ☐ SSG Logic - Error Process - [PBI/17464](#)

Improvements

We have finished work on the Secure Readings Robot, now allowing for meter readings from Secure to be assigned the 'LIB' manufacturer over the current 'UNKNOWN' manufacturer. Going forward, meters under a Secure Hub will need to be assigned this new manufacturer for reads to be added to Mabdeck correctly.

A Guru manufacturer has also been added to Mabdeck, though the 'UNKNOWN' manufacturer should still be used for these meters until the changes to the Reading Robot have been implemented.

- ☐ Add Meter Manufacturer for Guru to the Mabdeck and ReadingsAPI Databases - [PBI/21079](#)
- ☐ Update Secure Robot to assign meter reads with the Secure Manufacturer - [PBI/21082](#)
- ☐ Add new supply type for "Hot Water Return" - [PBI/22061](#)

Fixes

- ☐ Custom Form Fields - Meter fields not appearing on Meters import - [Bug/6999](#)

- ☐ Data Loggers - Marking a fault as resolved duplicates the data logger entry - [Bug/20444](#)
