

Release 2026.3 [17/04/2026]

General Overview & Impact

Hubs/PAYG Changes

In this release we have made some quality-of-life improvements to the processes of Hubs and PAYG accounts. We have now implemented a Hub Replacement form which, when accessed, will allow users to add details of a new hub and, when complete, will immediately end the previous hub as required. This will also work in PAYG mode. We have also added the ability to edit Payment Card numbers in PAYG mode, no longer forcing the user to change billing mode to action this.

- Hub Replacement - Hardware and Supply Page Changes - [PBI/15730](#)
- Hub Replacement Form - EE Monitor - [PBI/15861](#)
- Refactor Hub Adjust Debt - [PBI/21380](#)
- Refactor Hub Snapshot - [PBI/21486](#)
- Refactor Hub Valve Control - [PBI/21488](#)
- Refactor Hub Vend - [PBI/21491](#)
- Edit Payment Card while in PAYG Mode - [PBI/22000](#)

Orbit

In this release, work has been done on the last communication date/time to update so even if there is not a balance update event resulting in a supply controller closure, the last communication date/time is updated. We have also been working towards adding a new solution and making sure it interacts with Mabdeck.

- Orbit Hub Information - Last Communication Date/Time Updated by Supply Controller events - [PBI/20453](#)
- Add new orbit solution - Evinox HIU - [PBI/23187](#)

General Improvements

- Remove Unused Tables - [PBI/23864](#)
- Update Project Structure - [PBI/23868](#)
- Edit account import - template fields exist on the edit account form - [PBI/22633](#)
- Validation - Removal of Peer Comparison page - [PBI/20092](#)
- Address formatting Contact Tab pages - [PBI/8560](#)

Fixes

- [Bug 23573](#): Orbit Charges not ending correctly
